Remote or on-site

Backend and systems developer based in Cotonou. I have designed REST APIs, automated deployments and written low-level C/C++. I have worked with several languages and frameworks, so I pick up whatever a project needs quickly. I can also help build a product, from the first idea to a working first version. Open to freelance missions, part-time work and collaborations.

Experience

Since Oct. 2026
Incubation
Future Studio Cotonou, Benin
- Co-founder and CTO of Istorya (istorya.site), an AI-powered app for personalized children's stories in French, using cloned parental voices
- Product design, AI-assisted development and launch
- Current phase: acquiring the first users

Aug. 17 to Sep. 11, 2026
Facilitator, Pre-entrepreneurship Bootcamp 2026
Future Studio Cotonou, Benin, independent contractor
- Ran hands-on workshops and guided participants through their exercises
- Prepared participants for Demo Day

Apr. to Jul. 2026
Internship, Full-Stack Developer & Startup Venture Associate
Future Studio Cotonou, Benin
- ArbitraChain: architecture, arbitrage strategies and interfaces, AI-assisted development
- Istorya: product design and launch (social accounts and content, outreach to first users)
- Impact OS (internal platform for managing innovation ecosystems): communication and collaboration module (messaging, notifications), bilingual FR/EN, AI-assisted development

Skills

Comfortable with: C, C++, Python, JavaScript/TypeScript, REST APIs, Django/DRF, Linux (Fedora), Git/GitHub

Also worked with: PostgreSQL, Docker, React, Kubernetes, Jenkins, Ansible, Haskell, Rust (AI-assisted), x86-64 assembly, SQLite, HTML/CSS, Tailwind

AI tooling: AI-assisted development

Selected projects

Nov. 2025 to Jul. 2026
ArbitraChain
Epitech Entrepreneurial Project, then Future Studio
- Arbitrage bot for prediction markets (Polymarket), built with AI assistance
- Code structure, design of the arbitrage strategies, part of the interfaces

Jan. 2026
AREA, automation platform
Epitech Cotonou, Benin
- IFTTT/Zapier-style platform, Django/DRF microservices architecture, backend lead
- Asynchronous automation engine with multithreaded workers
- OAuth2 "Central Hub" backend serving web and mobile, deployed on Railway

Jan. 2026
Gomoku
Epitech Cotonou, Benin
- Game AI in C++: Minimax, Alpha-Beta pruning, Zobrist hashing

Nov. 2025
R-Type
Epitech Cotonou, Benin
- 2D game engine in C++17 with a custom ECS architecture
- Low-latency UDP network engine for multiplayer

Nov. 2025
Whanos, DevOps platform
Epitech Cotonou, Benin
- PaaS: automatic stack detection, standardized Docker images, deployment on Kubernetes
- CI/CD pipelines with Jenkins, provisioning with Ansible

Jun. 2025
Raytracer
Epitech Cotonou, Benin
- 3D rendering engine in C++: shadows, reflections, transparency

Sep. 2024
Minishell2
Epitech Cotonou, Benin
- Command interpreter in C: pipes, redirections, environment variables

Events

Feb. 2025 — Discovery 2025
Future Studio Cotonou, Benin
- Innovation week to design technical solutions to challenges in Benin's sports sector
- Group selected for the best solution to one of the proposed challenges

Education

Feb. 2024 to Aug. 2026 — Bachelor in Computer Science Expertise
Epitech Benin Cotonou, Benin

Jun. 2023 — Baccalaureate, series D
Cardinal Bernardin Gantin Benin
